

EGIS TNEL İLETMECİLİĐİ

Environmental Policy

As Egis Tnel İletmeciliđi, which operates Eurasia Tunnel, our environmental objectives are;

- Minimizing environmental impacts that may occur during tunnel operation services including maintenance, toll, traffic management and traffic safety activities,
- Following legislations during our activities, providing services according to national and international standards and improving our system according to the principle of continuous improvement,
- Ensuring all related parties, which are in Company's scope and limitations, work in accordance with Company's Environmental Policy (i.e.: energy consumption),
- Being in communication with ATA, subcontractors and suppliers to improve environmental impacts of the services,
- Ensuring that employees have trainings to improve their environmental awareness,
- Identifying environmental risks that can affect service, taking measures, increasing and sustaining Client satisfaction,
- Reducing wastes arising from our operations at its source and providing recovery as much as possible,
- Improving our environmental performance continuously and taking into account the environmental impacts of new investments in the Facilities,
- Minimizing the use of natural resources as a result of our continuous improvement efforts.

It is the most important duty of all of us to be leader in practices of renewable energy sources, energy productivity, reducing climatic changes, prevention of environmental pollution, increasing and popularizing environmental consciousness.
